Purpose of this Guide

This guide is intended to describe STARS trading partner code requirements. Trading partner codes are required for quarterly and year-end reporting of intragovernmental (between Federal agencies) and intra-agency (within DOE) revenues, costs, transfers, investments, receivables, other assets, payables, debt, deferred revenues and other liabilities. Trading partner codes enable the Department to classify its financial statement line items as either intragovernmental or public and to identify intra-DOE balances for elimination. Similarly, DOE's quarterly and year-end trading partner reports to Treasury identify intragovernmental balances for elimination in the Government-wide financial statements.

The Department's more significant intragovernmental transactions include revenues and related receivables for reimbursable work performed for other Federal agencies (*note that it's the revenues that are intragovernmental and not the related reimbursable work costs which are generally incurred through direct salary, contract and subcontractor charges, or indirect non-Federal costs*), transfers of oil from the Department of the Interior to the Strategic Petroleum Reserves, investments in Treasury securities, and debt and appropriations transfers related to certain funding of the power marketing administrations.

Trading partner codes are established by Treasury and depending on the specific reporting requirement can be either 2 or 4 digits. (Treasury requirements for trading partner codes are evolving and a further future expansion of the codes is likely.) The official list of trading partner codes is published by Treasury in the TFM and can be found at the following website: <http://www.fms.treas.gov/factsi/vol1/vol1appen5.doc>. This list is also reproduced as Appendix 1 of this guide.

The Department also has significant intra-office transactions that require DOE's specific trading partner code (89) in order to generate elimination entries. These include certain transfers of funding between appropriation accounts, intra-office transfers of property and inventories, intra-office receivables and payables, and intra-office revenues and costs. Periodic intra-office reconciliations should ensure that reciprocal account balances between offices are in agreement. In addition to using the DOE (89) trading partner code, all intra-office transactions should include an Other Party Identifier (OPI) code in the DFF values to facilitate these reconciliations between offices/integrated contractors

Trading Partner Function

STARS reports containing trading partner code data are generated from the General Ledger module. DOE developed a custom Trading Partner Function to meet trading partner code reporting requirements. This function uses the process depicted in Table A to identify trading partner code values for all general ledger reports.

Supplier/Customer Tables

For each new Federal Entity added to the STARS supplier and customer tables, the End User navigates to the correct data entry window and selects the Classification Type of 'FEDERAL'. The trading partner DFF is required for all Federal suppliers and customers and the End User must enter a 2 byte Trading Partner code by selecting from the list of values (LOV). Questions concerning the correct trading partner code should be directed to the site's STARS superuser, or alternatively to Marion Hoch at marion.hoch@hq.doe.gov or (301) 903-4216.

Integrated Contractor Interface

The Department's integrated contractors are required to supply an appropriate OPI value for inter/intra-office and inter-agency cost, revenue, transfer, receivable, and payable balances in their monthly data files uploads to STARS. The integrated contractor interface posts all transactions, except those associated with funded cost SGLs (61000000, 6500F000, 88020100, 88020200, 88020300, and 1990B700) directly to the GL. The integrated contractor interface generates the appropriate DFF trading partner value for these direct GL entries using the OPI/Trading Partner Table in STARS¹. Funded cost SGL transactions are processed through the PO and the AP modules, and the appropriate GL DFF trading partner code values are again generated from the integrated contractors' OPI data using the OPI/Trading Partner Table in STARS when these transactions are posted to the GL.

Trading Partner Code Edits

Consideration is being given to establishing front-end edits to preclude users from inputting trading partner code data that is inconsistent with the SGL trading partner rules (see Appendix 2). Until such time as these edits are established, a Discoverer exception report is available to identify SGL account balances that are inconsistent with these rules. Field offices should run this exception report on a regular basis and take corrective action to correct data errors. In addition, the current FSG abnormal balances reports are being modified to include balances at the trading partner code level. This modified report should be reviewed and corrective action taken to address abnormal balances for trading partners.

¹ If the OPI exists in the crosswalk table the Trading Partner is set based on the value in the table. If the OPI begins with alpha character it is set to "89". If it is numeric and doesn't exist in the table it is set to blank. Therefore, the Trading Partner Code DFF value is only set if an OPI exists.

Table A – Trading Partner Function

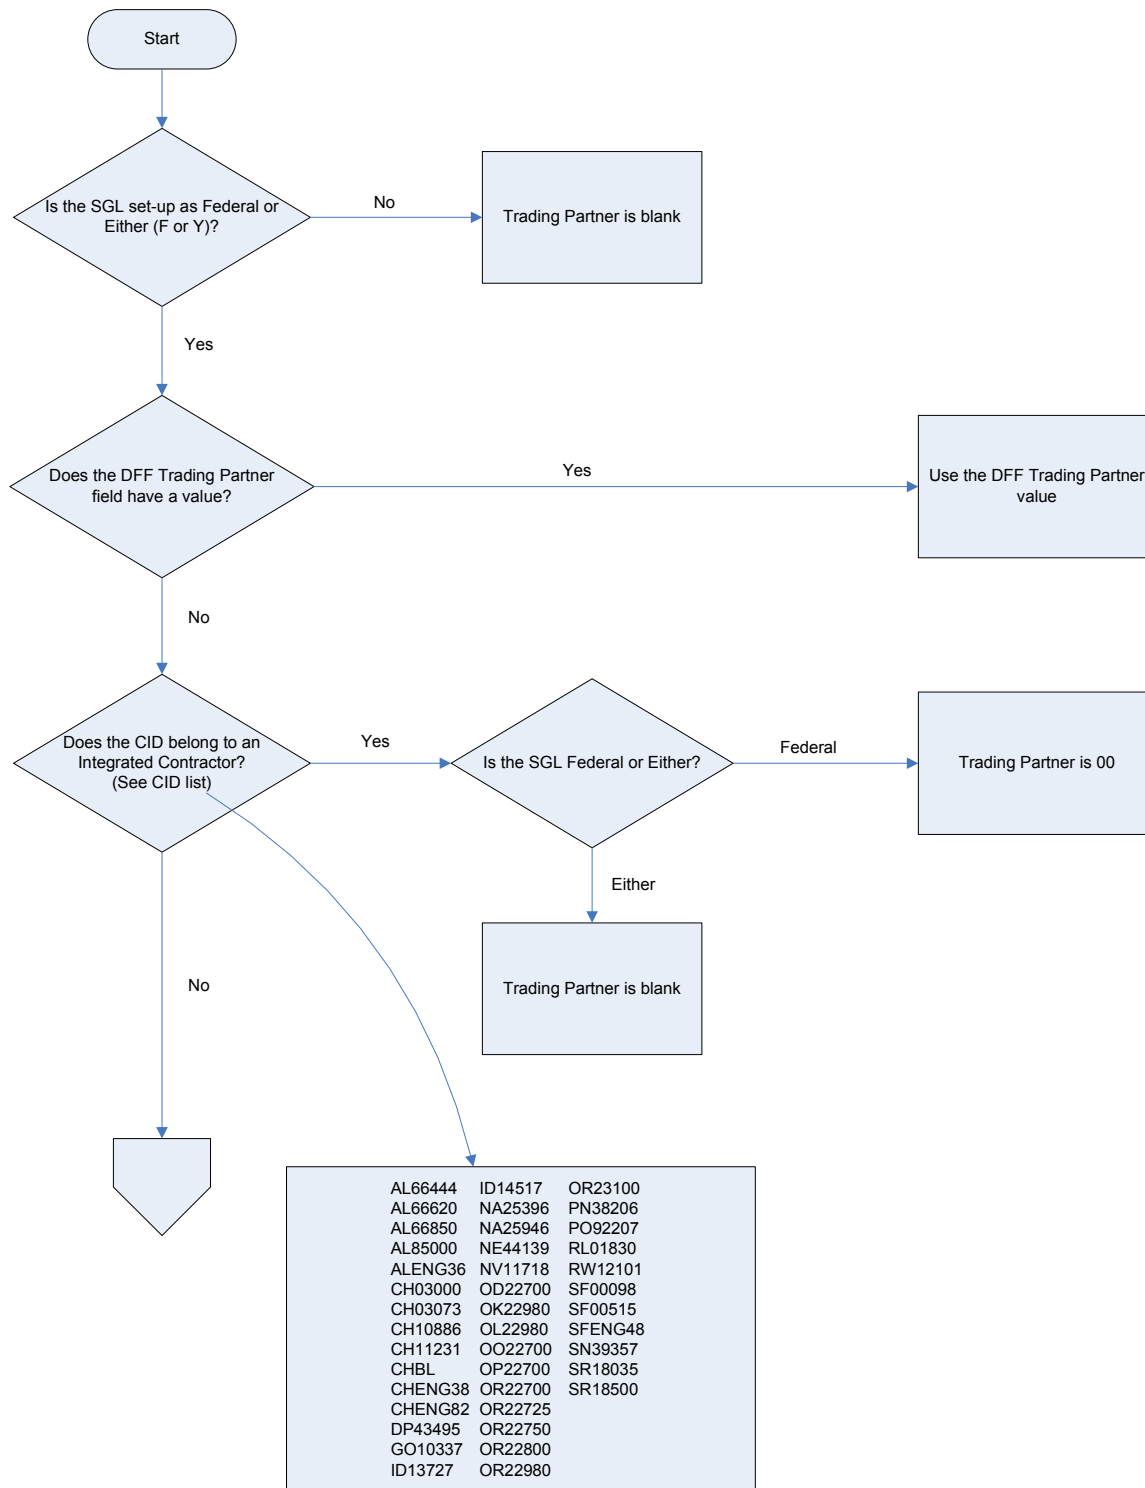

Table A (cont.)

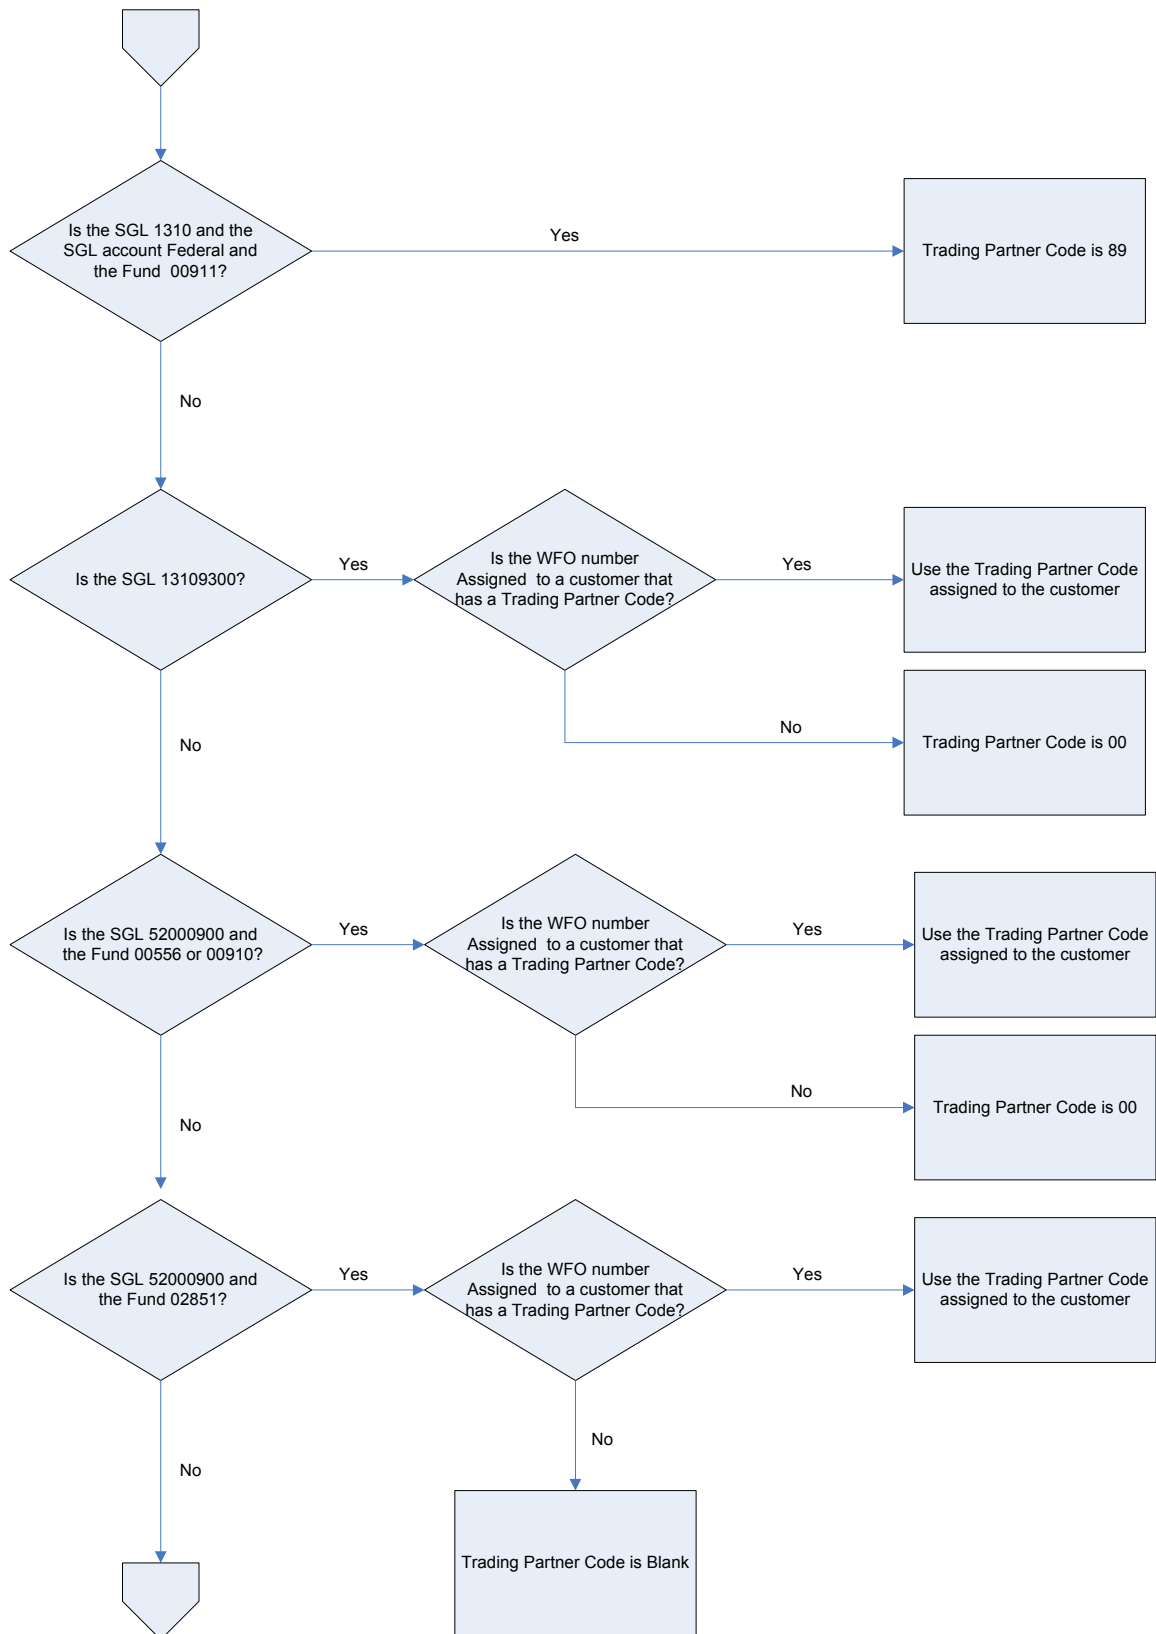

Table A (cont.)

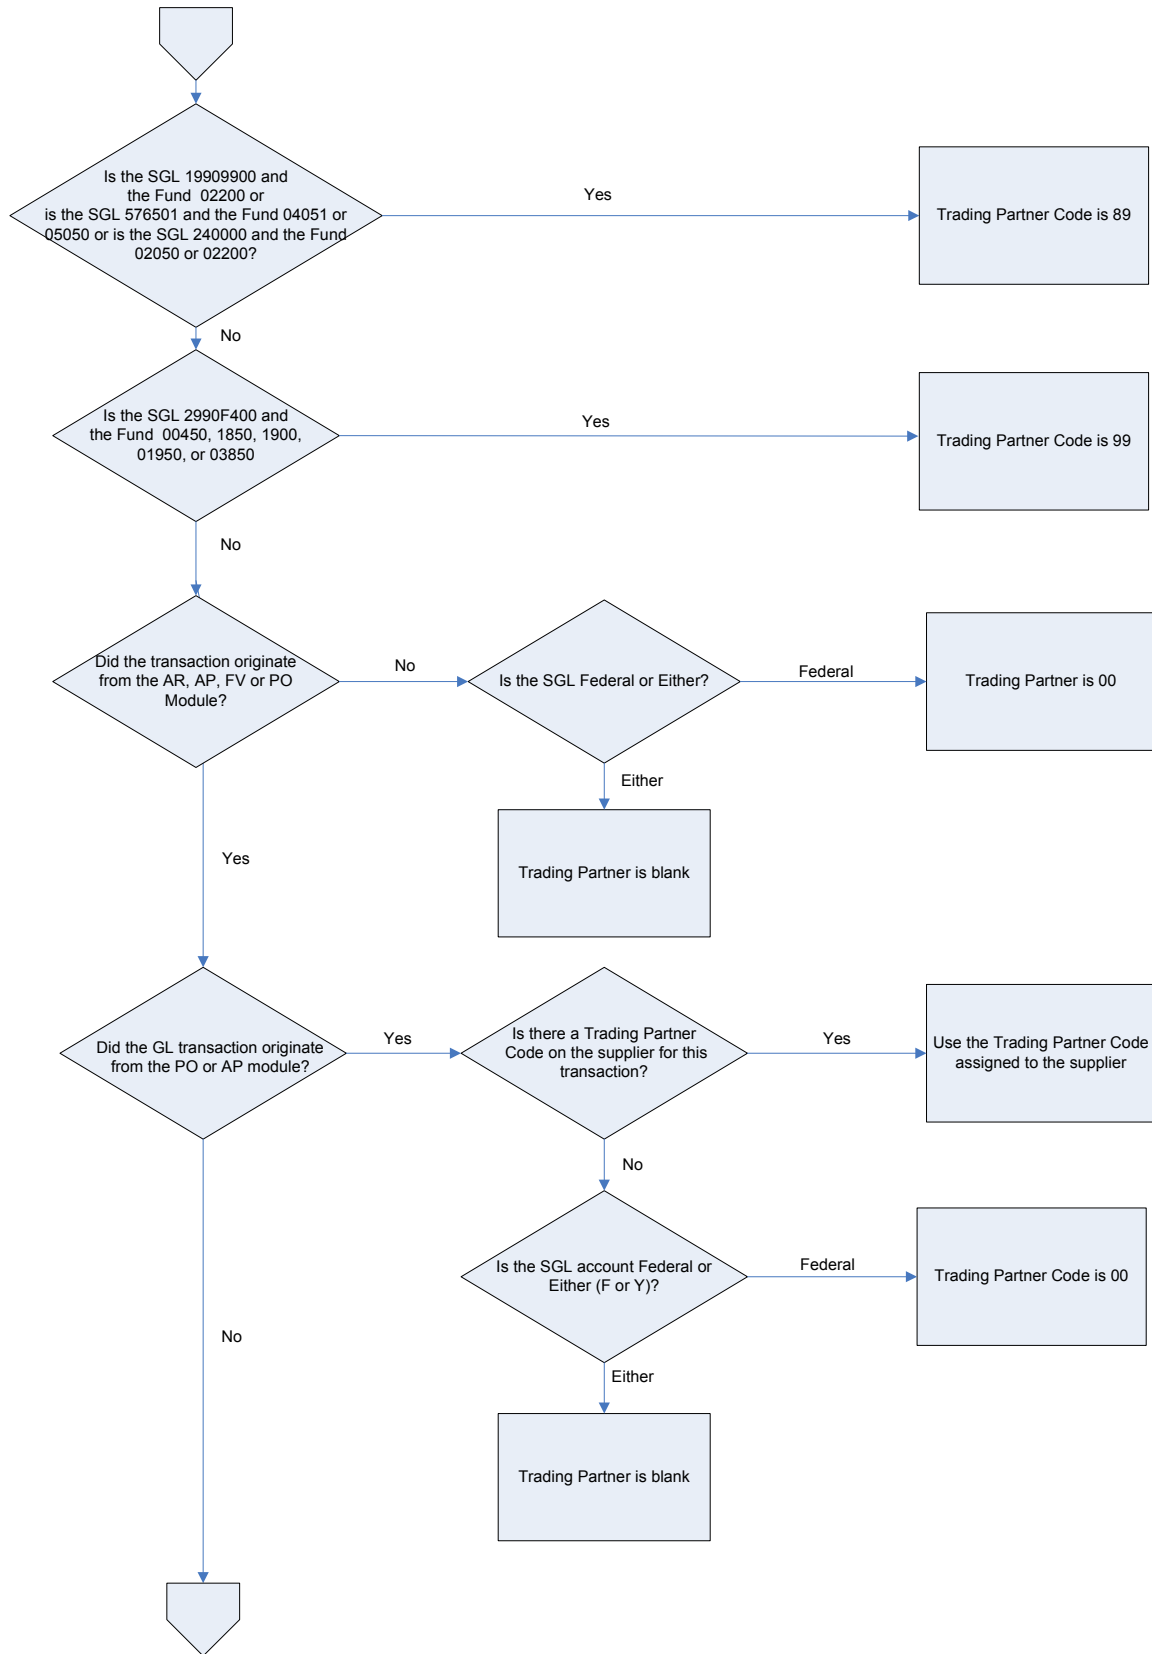

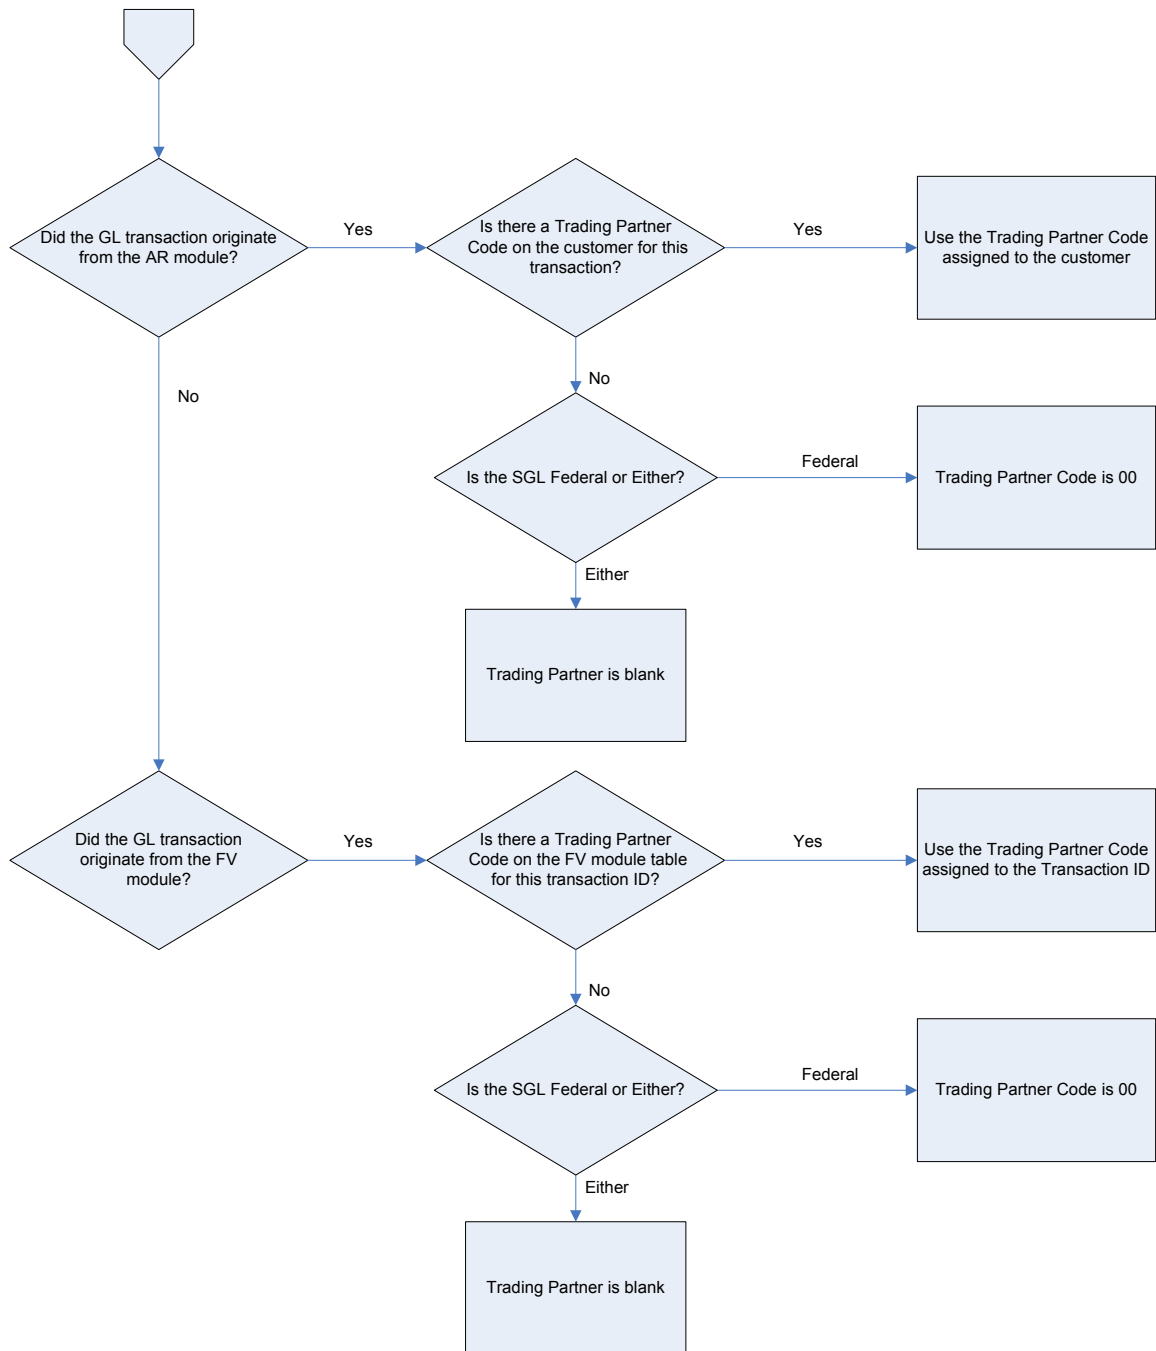

Table A (cont.)

Quarterly/Year-end Requirements for Trading Partner Code Reporting, Analysis, and Confirmations

Headquarters Reporting

At the HQs level, the following reporting requirements involve use of the trading partner code data in STARS:

- At the end of each quarter, the Department submits an intragovernmental FACTS I file to Treasury. This file is used by Treasury to compare DOE's reported balances by reciprocal SGL account combinations to those of other agencies. For example, DOE's accounts receivables with other agencies are compared to accounts payable owed to DOE reported by other agencies using DOE's trading partner code. Treasury generates a Material Status of Disposition Report identifying material discrepancies between DOE and other agencies by reciprocal SGL category. These differences are investigated to identify if the cause is due to different accounting treatment between the respective agencies or a reporting error by either agency.
- The Department is required to include a Schedule of Intragovernmental Balances in its annual financial statements that provides an agency-level breakout of each intragovernmental balance in DOE's financial statements.

Field Office/Integrated Contractor Analysis of Intragovernmental Balances

At the field office level, analysis of trading partner code data is routinely performed through the following:

- Identifying and resolving abnormal intragovernmental balances at the trading partner DFF level utilizing the following three reports:
 - DOE Abnormal Balance by Trading Partner Report
 - DOE Abnormal Balances by Allottee by Trading Partner Report
 - DOE Abnormal Balances by Allottee/Reporting Entity/SGL Trading Partner Report
- A review of trading partner exceptions using the report:
 - DOE Trading Partner FACTS 1 Exception Report - FACTS 1
- An analytical review of significant account balance changes using the report:
 - DOE Trial Balance by Trading Partner Code Comparison (CSV output)
- Periodic reconciliations of integrated contractor trial balances at the trading partner/OPI DFF level

Offices will also find the following reports useful in analyzing trading partner data:

- DOE AR Customer Trading Partner by Customer ID Report – enables users to look up the customer for transactions posted to GL from the AR module where the Attribute 7 field is populated in GL and is used to link to the customer record.
- DOE AR Customer Trading Partner by WFO Report – enables users to look up the supplier/trading partner assigned to a particular WFO value or range of values.
- DOE Trial Balance by Trading Partner Code (CSV output) – allows users to run a trial balance with a specific trading partner parameter

- DOE GL Journal Detail Report by Trading Partner Code Cross Indexed-Logic (CSV output) – Enables users to identify the specific transactions in the GL that comprise a trial balance amount for a specified trading partner.
- DOE GL Journal Detail Report with Trading Partner Code Cross Indexed-Logic (CSV output) – Enables users to identify specific transactions comprising a trail balance amount without specifying a specific trading partner parameter.

Field Office/Integrated Contractor Analysis and Confirmations of Inter-Office Balances

The 25th of each month is the Department-wide cutoff for integrated contractors to bill other integrated contractors for inter-entity work and for issuing property and inventory transfers. Each organization preparing transfer vouchers should, in accordance with the Accounting Handbook Chapter 12, Inter-Entity Transactions, confirm all transfers made during September with the organization receiving the transfer voucher by telephone as soon as possible consistent with year-end closing instructions.

Allottees and their integrated contractors must also perform confirmations of material inter-office balances to ensure there are no significant differences at the end of the third quarter and at year-end. Allottees are required to use the following STARS reports as of May and August months-end to compare interoffice balances with the reciprocal balances reported within and by other allottees:

1. Confirmation of Inter-Office Balances - Real Accounts
2. Confirmation of Inter-Office Balances - Nominal Accounts
3. Confirmation of Inter-Entity Balances - Real Accounts²

Any significant differences should be resolved prior to the June 25th and September 25th cut-offs for billings and transfers. Offices are encouraged to use the standard confirmation format when requesting confirmations of material balances from another office which can be found at ...

In addition, each allottee will prepare a final year-end reconciliation of interoffice balances using the above STARS confirmation reports. Significant differences for this final reconciliation must be resolved or brought to the attention of the Director, Financial Reporting and Analysis Division, for resolution by the date stipulated in the annual Year-End Financial Statement/Closing Guidance.

Each of the confirmation reports compares the balances for the allottee requesting the report (Allottee Net Amount) to the balances reported by all other allottees using an OPI belonging to the requesting allottee (Reciprocal Allottee Amount). As an example, the following two sets of nominal confirmation account reports were run using allottee 01 and allottee 02 requesting codes, respectively (*note that the reports generate a CSV output file that must be exported to Excel and a pivot table created*):

² The Confirmation of Inter-Entity Balances – Real Accounts report contains balances associated with work funded by the performing office through fund 00911. Generally, the receivables in the 00911 fund will be included and matched with the liabilities of the authorizing offices' CIDs. Authorizing office CIDs are identified through the STARS value set **DOE_AUTH_OFFICE_PO**. Offices entering WFO values for enter-entity work will need to update this value set as POs funding the enter-entity work are established. Instructions for updating this STARS value set are included as Appendix 5 of this guide.

Allottee 01 Inter-Office Confirmation Analysis Report
Nominal Accounts as of SEPTADJ1-05

		Data	
OPI Allottee	SGL	Sum of Allottee Net Amount	Sum of Reciprocal Net Amount

Allottee 02 Inter-Office Confirmation Analysis Report
Nominal Accounts as of SEPTADJ1-05

		Data	
OPI Allottee	SGL	Sum of Allottee Net Amount	Sum of Reciprocal Net Amount
01	57200100	(44,833.96)	-
	57200800	(2,977,376.27)	-
	57300100	-	44,833.96
	57300800	-	2,977,376.27
01 Total		(3,022,210.23)	3,022,210.23
02	57200100	(54,113,093.32)	-
	57200800	(13,908,037.35)	-
	5720A500	13,375,175,587.00	-
	57300100	54,113,093.32	-
	57300800	13,908,037.35	-
	5730A500	(13,375,175,587.00)	-
02 Total	57900100	-	-
		-	-
30	51000900	-	(4,624.79)
	52000900	-	(6,770.00)
	57200800	(2,784.00)	(49,621.50)
	57300800	1,546,325.50	-
30 Total		1,543,541.50	(61,016.29)

The OPI Allottee fields in each of the two reports are determined as follows:

1. For the Allottee 01 report –
 - a. OPI Allottee = 01 for allottee 01 data
 - b. OPI Allottee = 02 when the OPI value belongs to allottee 02 per the OPI crosswalk table in Appendix 3; 30 when the OPI value belongs to allottee 30; etc...
2. For the Allottee 02 report –
 - a. OPI Allottee = 02 for allottee 02 data
 - b. OPI Allottee = 01 when the OPI value belongs to allottee 01 per the OPI crosswalk table in Appendix 3; 30 when the OPI value belongs to allottee 30; etc...

Balances at the OPI Allottee summary level should be offsetting between the Sum of Allottee Net Amount and the Sum of Reciprocal Net Amount. Otherwise, differences must be resolved between the respective offices. More detail, such as the DFF OPI values or any or all AFF values can be added to the pivot tables for further analysis. In addition, if more detail is needed at the transaction level vs. the trial balance AFF level, the STARS report “DOE GL Journal Detail Report with Trading Partner Code Cross Indexed-Logic (CSV output)” can be used.

Elimination Entries

Elimination entries are prepared by The Office of Finance and Accounting for quarterly and year-end financial statements purposes based on SGL account balances with DOE’s trading partner code. Reconciliations of trading partner 89 data between offices are necessary to ensure there are no material differences that would adversely impact the ability to prepare these elimination entries. The elimination entries include the following:

1. NWF Deferred Revenues
2. D&D Fund Support Costs
3. Working Capital Fund Revenues
4. Isotope Program Support Costs
5. PMA Power Sales/Purchases with DOE Labs
6. Non-WCF Advances
7. Undistributed IPACS
8. Inter-Entity Work Receivables and Payables
9. Other Inter-Office Accounts Receivables/Payables

Inter-entity work results in receivable and payable real account balances that require eliminations in DOE's consolidated financial statements. The DOE policy for inter-entity work is contained in Chapter 12 of the DOE Accounting Handbook and specific accounting entries for inter-entity work between integrated contractors are prescribed in this policy. The specific accounting transactions associated with inter-entity work orders between DOE field offices, DOE field offices and integrated contractors, and shared services are identified in Appendix 4 of this guide. Reconciliations of the inter-entity receivables in Fund 00911 and payables in the authorizing offices' funds is an important step to ensure that Headquarters can prepare elimination entries for these reciprocal offsetting real account balances.

Conversely, the accounting entries for inter-entity work result in net zero nominal revenue balances and net zero nominal cost balances in Fund 00911, except when timing differences occur between when the inter-entity costs are incurred by the performing office and when they are billed to the authorizing office. For inter-entity work funded through the 00911 fund and are billed by EFASC, any year-end timing differences for unbilled costs are adjusted through an accrual entry that results in a debit to unbilled receivables with an offset credit to costs, effectively zeroing out any such timing difference for financial statement reporting purposes. Therefore, no nominal account elimination entries are required for these inter-entity activities.

Appendix 1 - Federal Trading Partner Department Codes for GFRS and FACTS I

The following crosswalk provides Federal trading partner codes that are required for the Governmentwide Financial Reporting System (GFRS) and Federal Agencies Centralized Trial Balance System I (FACTS I). These codes are used to facilitate the preparation of the Financial Report of the United States (FR). The identification number shown below under GFRS Codes is unique to GFRS. In most instances, the 2-digit department code used in FACTS I has two zeros added to the end for the purpose of GFRS (that is Department of Treasury, FACTS I Codes 20, GFRS Codes 2000). The Department of Defense (DOD) Trading Partner Code DE00 will include the Department of Air Force, the Department of the Army, the Department of the Navy, the Defense Agencies, and the U.S. Corps of Engineers. The Trading Partner Code 9500 will include independent and other agencies. The FACTS I Trading Partner Codes did not change.

GFRS Codes	FACTS I Codes	Department or Agency
1200	12	Department of Agriculture
1300	13	Department of Commerce
1400	14	Department of Interior
1500	15	Department of Justice
1601	16	Department of Labor
1602	16	Pension Benefit Guaranty Corporation
1800	18	U.S. Postal Service
1900	19	Department of State
2000	20	Department of Treasury
2400	24	Office of Personnel Management
2500	25	National Credit Union Administration
2700	27	Federal Communications Commission
2800	28	Social Security Administration
3100	31	U.S. Nuclear Regulatory Commission
3300	33	Smithsonian Institution
3600	36	Department of Veterans Affairs
4700	47	General Services Administration
4900	49	National Science Foundation
5000	50	Securities and Exchange Commission
5100	51	Federal Deposit Insurance Corporation
6000	60	Railroad Retirement Board
6400	64	Tennessee Valley Authority
6800	68	Environmental Protection Agency
6900	69	Department of Transportation
7000	70	Department of Homeland Security
7200	72	Agency for International Development
7300	73	Small Business Administration
7500	75	Department of Health and Human Service
7802	78	Farm Credit System Insurance Corporation
8000	80	National Aeronautics and Space Administration
8300	83	Export-Import Bank of the United States
8600	86	Department of Housing and Urban Development
8900	89	Department of Energy
9100	91	Department of Education
DE00	17 21 57	Department of the Navy Department of the Army Department of the Air Force

	96	U.S. Army Corps of Engineers
	97	Office of the Secretary of Defense - Defense Agencies
9900	99	Treasury General Fund
9500	01	Architect of the Capitol
	03	Library of Congress
	04	Government Printing Office
	05	General Accounting Office
	08	Congressional Budget Office
	09	Other Legislative Branch Agencies
	10	The Judiciary
	11	Executive Office of the President
	22	Resolution Trust Corporation
	23	U.S. Tax Court
	26	Federal Retirement Thrift Investment Board
	29	Federal Trade Commission
	34	International Trade Commission
	41	Merit Systems Protection Board
	42	Pennsylvania Avenue Development Corporation
	45	U.S. Equal Employment Opportunity Commission
	46	Appalachian Regional Commission
	48	Temporary Commissions
	54	Federal Labor Relations Authority
	56	Central Intelligence Agency
	59	National Foundation on the Arts and the Humanities
	60	National Railroad Retirement Investment Trust
	61	Consumer Product Safety Commission
	62	Office of Special Counsel
	63	National Labor Relations Board
	65	Federal Maritime Commission
	71	Overseas Private Investment Corporation
	74	American Battle Monuments Commission
	76	Historical and Memorial Commissions
	78	Farm Credit Administration
	84	Armed Forces Retirement Home
	88	National Archives and Records Administration
	90	Selective Service System
	93	Federal Mediation and Conciliation Service
	94	Arms Control and Disarmament Agency
	95	Independent Agencies
9999	00	Unidentified

To record month-end adjusting entry to bring YN1901/YN1902 B&Rs into agreement.

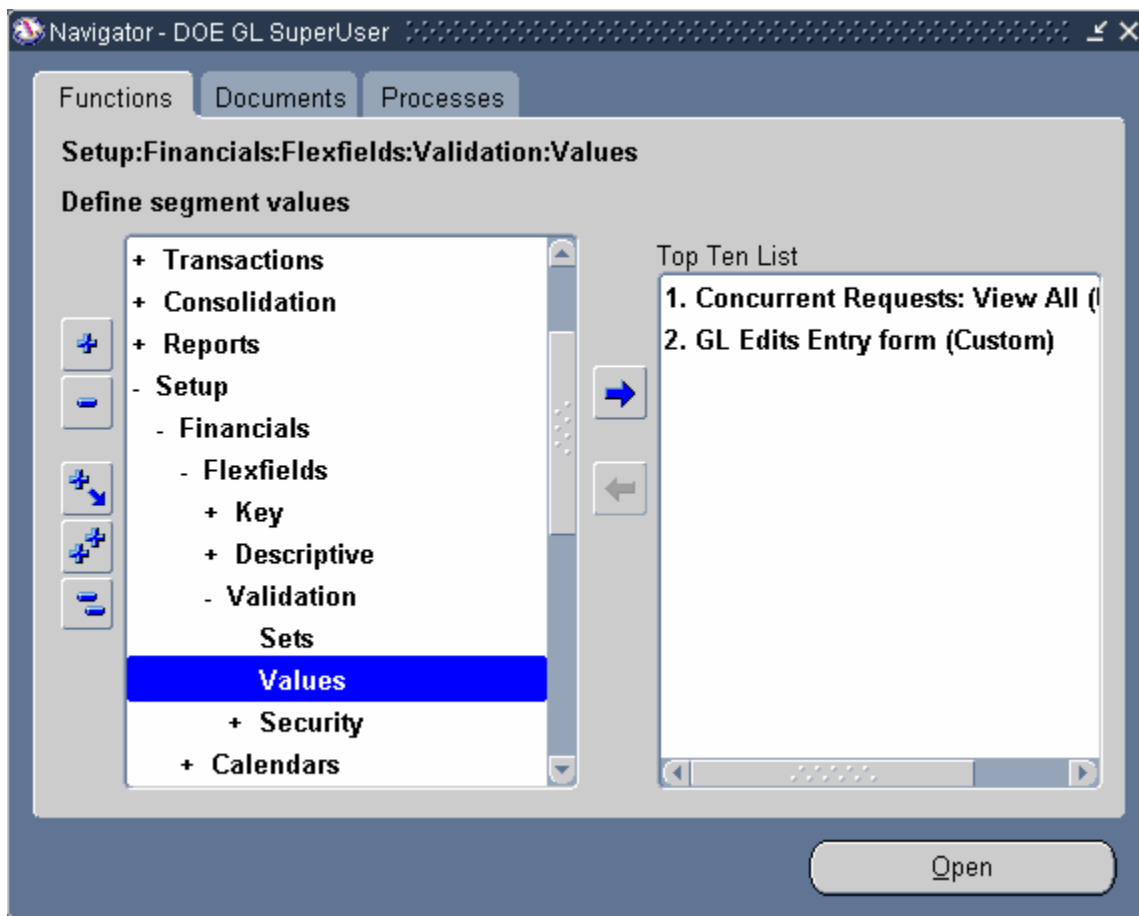

Appendix 5 - Instructions on How to Modify the DOE_AUTH_OFFICE_PO Value Set

Summary

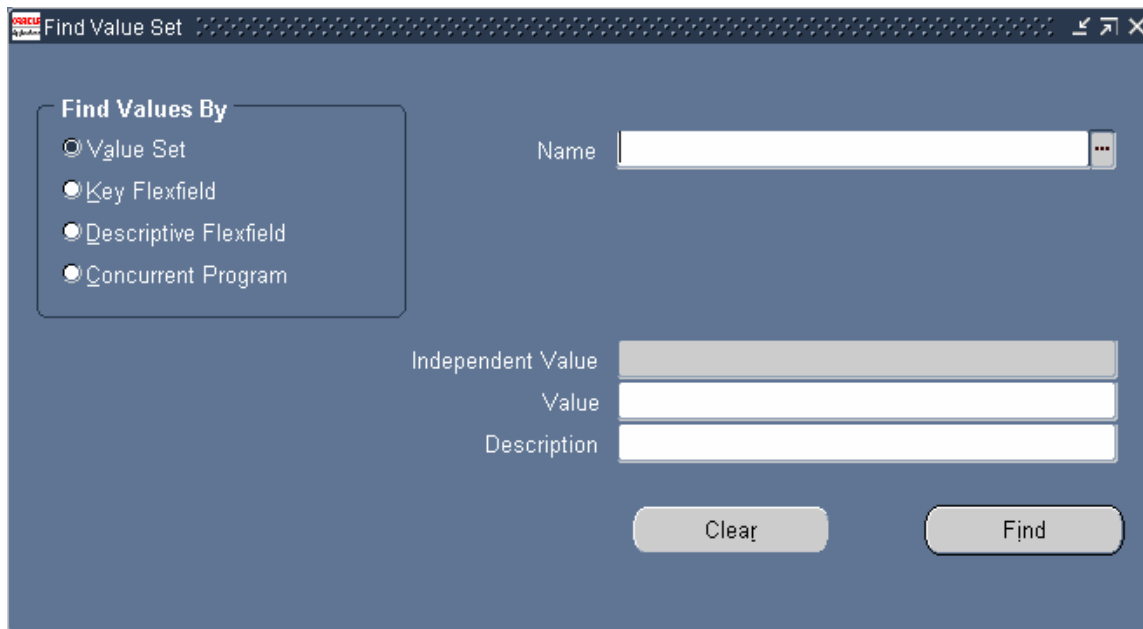

This document will provide step-by-step instructions including screenshots on how to modify the DOE_AUTH_OFFICE_PO Value Set in STARS. The user can either insert or end-date a PO value in the DOE_AUTH_OFFICE_PO Value Set.

Field offices responsible for establishing their own WFO values will need to update the DOE_AUTH_OFFICE_PO Value Set in STARS when establishing a PO to fund inter-entity work as the authorizing office. EFASC will update this value set for those offices for which it maintains responsibility for WFO value set-ups.

- Log into Oracle Applications and switch to the DOE GL SuperUser responsibility.
- Next, drill down to Setup->Financials->Flexfields->Validation->Values (as shown below):

- The Find Value Set Form will appear (as shown below):

Find Value Set

Find Values By

Define Child Ranges Move Child Ranges View Hierarchies

- You can insert a new record by clicking on the New icon (as shown below):

- There are three ways to end-date a value:
 - You can Disable the record by unchecking the Enabled field.
 - Or you can enter yesterday's date in the To field.
 - Or Both (Disable the record and enter yesterday's date in the To field).
- Make sure to save the record once you have made any changes.
- You are done.
